FAST AFM-889

FAST Anti Fungal And Moisture Resistant

DESCRIPTION

FAST Anti Fungal and Moisture Resistant is a premium-quality exterior paint designed to shield your home from the harmful effects of various weather conditions. Equipped with Smart Release Technology, it offers superior defense against algae and fungus caused by sun and rain exposure. With a mid-sheen finish, it delivers excellent dirt resistance, flexibility, and an enhanced spread rate.

BENEFITS

- The Advanced The advanced coating system provides exceptional resistance to water and dirt.
- Excellent UV protection and moisture control.
- It dries quickly, allowing for faster recoating and saving labor.
- It offers excellent durability, flexibility and adhesion.
- Lock porosity of the substrate and create anti-porous surface to prevent moisture penetration.
- It is suitable with EIFS, XPS & EPS system.

USES

- Suitable for cement plaster, gypsum plaster, and concrete surfaces.
- Works well on fiber cement and composite boards.
- It Can be applied on previously painted surfaces, mild steel, iron, and galvanized iron.
- Ideal for wooden surfaces when proper preparation and priming are performed.
- Perfect for bathroom and kitchen ceilings where extra mold resistance is needed.

PREPARING THE SURFACE

Ensure new or bare surfaces are clean, dry, and free from efflorescent salts. Sand the surface using appropriate sandpaper or sandstone to smooth out the plaster. Thoroughly remove any dust. For optimal results, follow the correct application procedure. Allow the surface to dry for 2-3 hours before applying the topcoat.

TECHNICAL INFORMATION

PACKING:

5 kg Gallon

SPREADIN RATE:

Approx. 18m² -2m² per kg depending on surface porosity, profile and application method.

DENSITY:

Density at 23°C Approx. 1.29

COLOUR:

White, Beige, Light Green, Light Pink Light Purple, Light Blue, Light orange and as per customization.
